

Sports Card

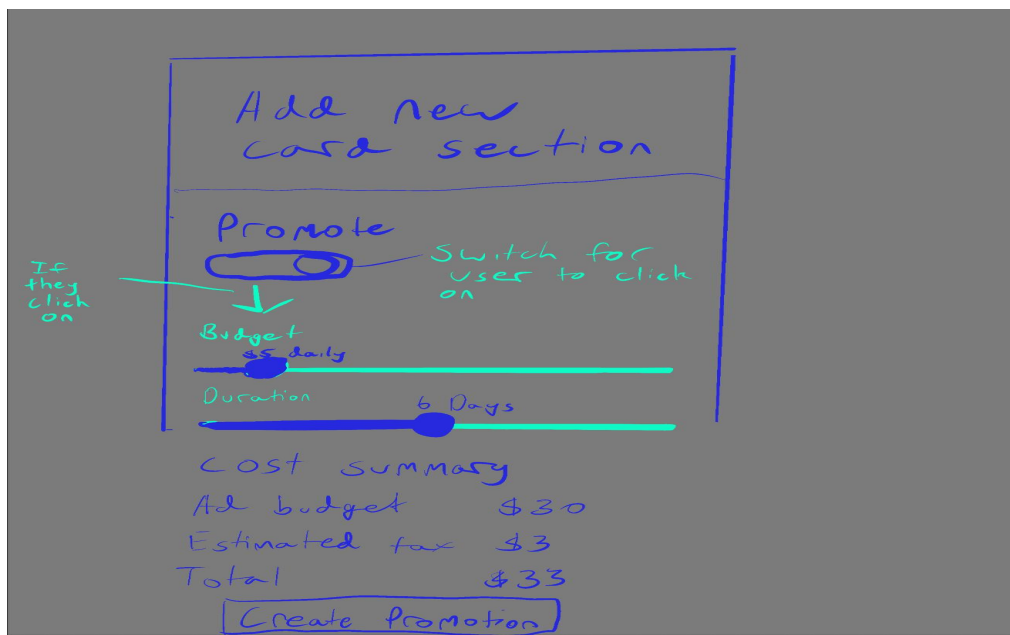

Hello,

Latest APK :-

https://drive.google.com/file/d/15cn68XtiYV-o_yEsrNtZW1jJza1TwgAF/view?usp=sharing

Feedback Work:

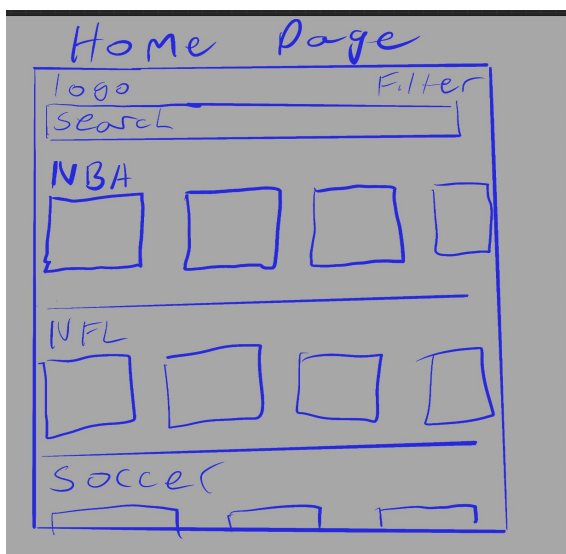

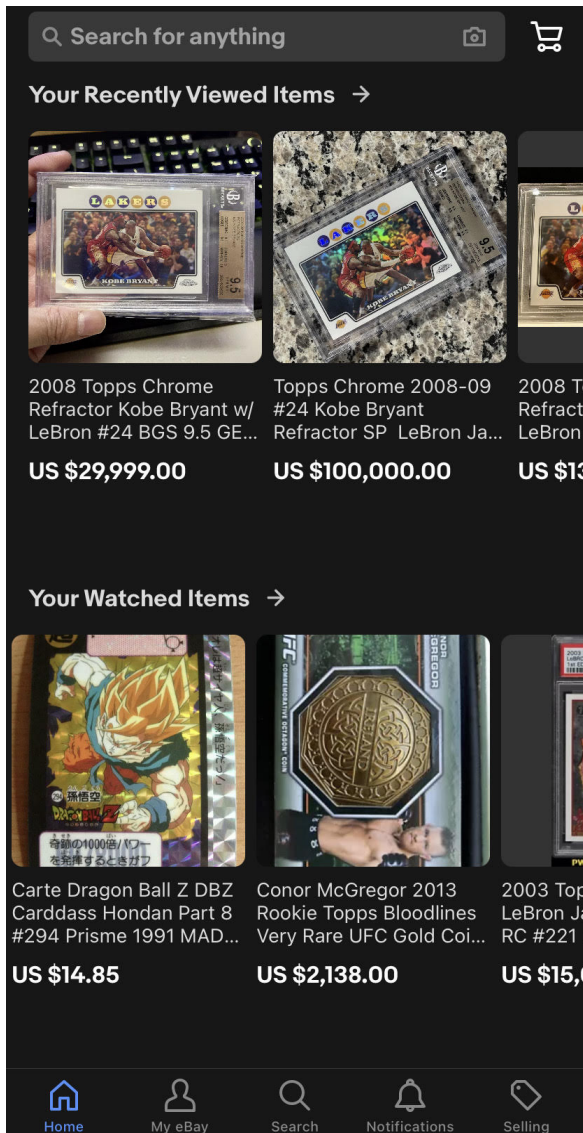

05-03-2021: New Completed work:

- 1) If multiple people have promoted a similar listing, the listing that is shown first is whoever has paid the most for that day. **DONE**
- 2) Promotion Feature done with stripe payment gateway You can use test card details for now: **DONE**
4242424242424242
123
21/32

NOTE: Paypal not done yet

- 3) Promotion no of days and \$ calculation done and for now Estimated tax we set 3\$ **DONE**
- 4) In home screen and in all search: All Promotion Post will show on top and with a P tag in left corner of image so its shows its promotion card. **DONE**
- 5) Home Page New layout Done as per your Drawing **DONE**

4: Filter: please change this pop up to show the buttons, instead of a drop down menu. This will mean we can remove the 'Reset' button as users can just unclick a selected button.

- Also please change Price Descending to 'Lowest Price' and price ascending to 'Highest Price'. And please change 'Most Popular' to 'Best Match'. This will be the best match of keywords from the users search words. **DONE**

Last feedback Done work:

1: Creating username, should be up to 16 characters.

-When the alert came up for my username not being able to be over 10 characters, the words 'greater' and 'than' were spelt wrong, please fix this. **DONE**

2: I don't like the new crop image feature. Instead, can we please just replicate the ebay system for images. If the image is too long, it is still shown without the dimensions changing and warping the image, it is just more zoomed out.

- If the user wants to take a photo, the camera only allows the user to take an image the size of the dimensions on the tile. Please test out ebay's app and add an image so you can see how that works. **We will do in last**

3: Adding card page: The dollar sign is still too high, when a number is entered, it is not inline **DONE**

4: Filter: Please remove the drop down options. I want it to be a selection tab option, the same as when the user is adding a card and they can choose which sport it is by selecting which tab they want.

-Most popular still has not been changed to 'Best Match', please change most popular to best match. All these options need to be tabs (the same as the sports appear on the add card page), so the user can select which filter option they want. **DONE**

5: My listings: Please change the word from 'approved' to ACTIVE and have this button appear in green, not blue. **DONE**

I want the user to be able to click 'Active' to switch the card to not active. Then when the card is not active, I want it to appear in a red button "Inactive" so the user can click that, to turn it back on to active. **DONE**

6: Alerts: please remove the word "Alert", it does not need to say alert on pop ups. **DONE**

7: please also remove facebook login, only have Gmail and manual register/login **DONE**

8/03/21

1: Promote feature

- The title 'Promote' needs to be in a smaller font **Done**
- -'Budget' needs to be in a smaller font **Done**
- Please remove (In days) **Done**
- Please copy the instagram style for promoting, I want the same look and feel as this. **Done**
- Refer to video I sent to Shweta and image below **Done**

The screenshot shows a mobile app interface with a dark background. At the top, there is a navigation bar with a back arrow on the left, the title "Budget and duration" in the center, and a "Next" button on the right. Below the navigation bar, the text "\$42 over 6 days" is displayed in a large font, with "Total spend" in a smaller font underneath. Below this, the text "6,000 - 16,000" is displayed in a large font, with "Estimated reach" in a smaller font underneath. The section is divided into two parts: "Budget" and "Duration". Under "Budget", there is a horizontal slider with a blue line and a white circle marker, with the text "\$7 daily" above the marker. Under "Duration", there is a horizontal slider with a blue line and a white circle marker, with the text "6 days" above the marker.

-Change 'Create Promotion' colour to a green box with black text

2: Filter Pop up: Change title of 'Search by Sport's' to 'Search' and 'Sort by' to 'Sort' **Done**

3: Add card page: Please make the corners of these white boxes slightly curved, so they are less sharp.

- Can we please also make the boxes the same colour as the background but give them a blue border. Then change the text to white please.
- Can you please do this to all white text boxes on the app.
- Please make the load sign pop up the same background please and with blue for the loading sign. **Done**

4: Home page - I would like to begin by using the original home page view, which just shows listings in their normal format. Not the view of featured cards from each sport.

-I would like users to open the app and automatically see 'Recently added' cards on their home screen, including all sports. Similar to a news feed they can scroll.

-This will mean the 'Recently added' filter is automatically selected when opening and the user can then select a sport to add to the filters or search for a card by key words.

-On this view, for every 4th listing, I would like this to be a slot to show a 'promoted' listing. So if users pay to promote their listing, they also appear here too. With the highest paying promotions at the top. I would like the promoted listings to stand out a little, maybe with a blue border and blue text 'promoted'. **Done**

-Then if a user chooses NBA as a filter, they will only see promoted listings of NBA cards.

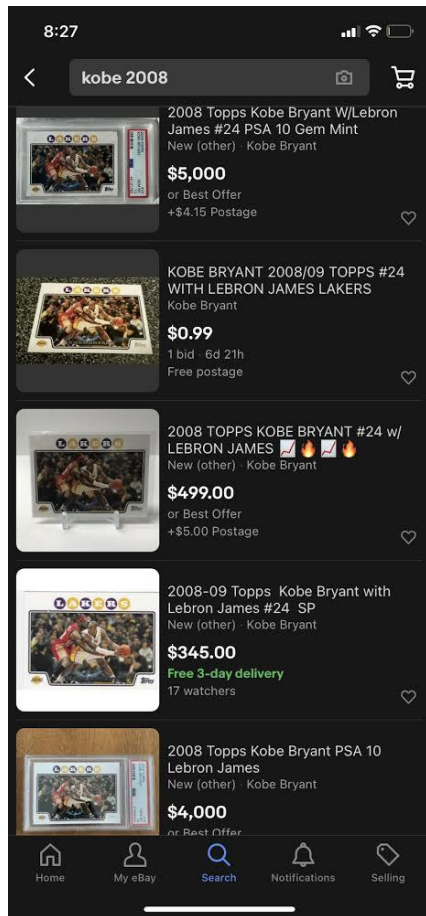

11/03/21:

Apk:

1: Please change the layout of the cards on the home screen, the same style they were before. When I asked for the home screen to be changed to just show recently added, I didn't mean for the layout to appear that way.

The cards should appear in rows, like they previously did. **Done**

-The blue border also needs to go all around the listing **Done**

2: The search text box on the home page, message page and watchlist, can you please change the colour to be the background colour and also place a blue border around these text boxes. Just like the add card page. **Done**

3: Add card page: The text 'Title' is not in the centre of the text box, can you please lower the text a little bit. **Done**

4: Promote: The Budget metre needs to start at \$1 per day and the max should be \$50 per day. Most users will choose under \$10 per day, so it needs to be easier to choose lower numbers, not \$2000. **Done**

- Can you please make the green "Create Promotion" button a brighter green colour **Done**
- Payment option, can you please have a 'Credit Card' or 'Paypal' tab at the bottom above "create promotion" where they can choose either option and details to pay with credit card or paypal appear? **Paypal we will do in last Done**
- The payment process needs to be really smooth **Done**

5: Currently when a user comes to the home page, it is automatically on 'newest' which is great.

-But if a user searches for keywords, it should automatically switch to 'Best Match' and then the user can change filters if they wish. **Done all filters automatically taking best matching in top in results**

-So when a user comes to the home page for the first time, it should show 'Newest' but if they then type to search and click search, it should automatically show 'best match' results, as this is what they will want first. **Done**

6: Add Card - Add image. **Done we removed the cropper and now the image is uploading in actual size. it looks good now. We have put a script for this.**

-I don't want users to crop the image, I want them to add whatever image size they want and we just display it the best we can.

-We can't have the image warped (it can't change the shape of the card or image itself)

-I want it to be the same process as ebay when adding an image, very simple and easy.

Thanks

Shweta

15/03/21

1: Logo changed on the app icon, opening page and all throughout the app.

For the app icon, please only use the emblem, not the words BINHAWK. **Done**

2:My listing page: **Done**

-If a user taps on the listing, it should open up to edit the listing. I don't want the user to have to swipe to edit the listing **Done**

-When the user is editing the listing, they should be able to promote the listing, so the promote button needs to be shown here too.**Done, if a post is already permitted then Promote feature will not show during edit bcoz its already promoted.**

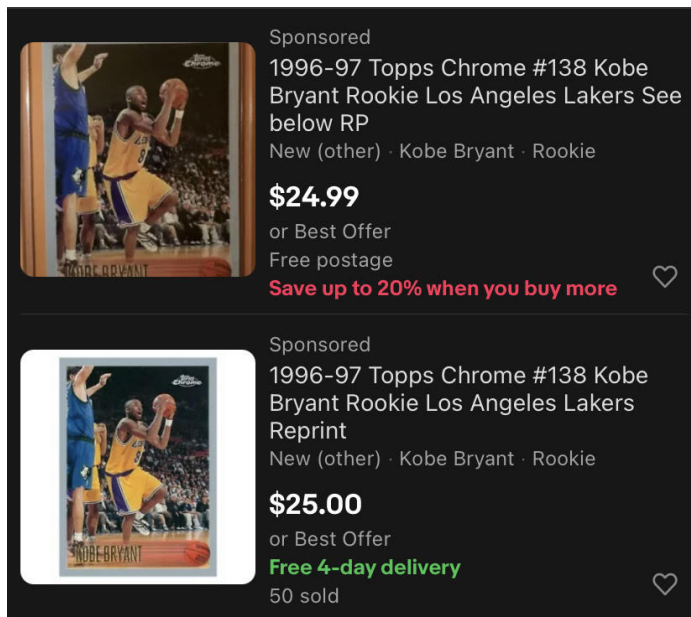

-When a card is active and a user taps on 'active', the text shown needs to say 'Do you want to deactivate this listing?' **Done**

-When a listing is 'inactive' and the user clicks on the 'Inactive', the text should say 'Do you want to activate this listing?' **Done**

Home screen: **Done**

- Please remove the 'P' for promotion. Instead, please in gray writing and small text, please have 'sponsored' appear on the listing tile. Similar to the image below**Done**

-

-

-Please also have the blue border go around the listing completely with rounded edges. This is only for promoted listings. Which is 1 promoted listing every 4 listings. So: Promoted, Normal, Normal, Normal, Promoted, Normal...**Done**

-When a user enters the page, the filter needs to be '**Newest**' (This is complete), if a user searches a card using the text box, it **HAS** to automatically change to '**Best Match**' filter, unless the user manually chooses one of the other filters normally.

-So if no filter is manually chosen, always search with '**Best Match**'. **Done**

-Typing, every time I try to type on the app, there is no button on the keyboard to exit typing mode. This is very annoying for users as the keyboard does not pop down. For example when entering price for a new listing, when finished, I select 'go' on the keyboard and nothing happens. **Done**

-Search bar:

When typing a small X appears to remove the text typed. This is great, just please make the X with the circle appear in white. It is currently black and hard to see. **Done**

Messages: **Done**

When the user has a new message, it currently appears in pink for the notification on the Message page. Please change this to red. **Done**

17-03-2021:

- 1) Click on listing to edit form open **Done**
- 2) Yes on home page, please change the blue line between listings to grey.
The only blue lines should be the blue around the promoted listings **Done**
- 3) Logo with esp extension not in JPG check logo folder that i have shared with you, The eps logo also needs to be used inside the app. No white around the emblem please **Done**
- 4) The message chat, the notification for new message is off the screen ,Please move this notification across **Done**
- 5) For promotion, please change total \$ amount possible to be \$40 a day in add and edit card **Done**
- 6) Please make the maximum amount of days for promotion 15 days in add and edit card **Done**
- 7) When open up seller profile, there is a white box around the users name, please make this the same colour as the background, with a blue line border around that box **Done**
- 8) On sellers profile, please change the word 'post's' to 'Listings' **Done**
- 9) paypal working in add and edit card **Done**

Update 28/04/21

Start from here:

Latest apk -

<https://drive.google.com/file/d/19Ofqh1aQQOvle3FVc78KBGxZ0-oNHsL3/view?usp=sharing>

Lates IPA - <https://i.diawi.com/EXs79i>

- 1: add google login in ios app **(done)**
- 2: make sure description text does not run under the watch list love heart **(done)**
- 3: My listing page: When clicking 'active', the pop up does not need the text 'are you sure?', please remove this. **(done)**
- 4: when marking a listing as sold, the text needs to say 'Would you like to mark this listing as sold?'
-It currently says ' Do you want to mark as sold this listing?' this is incorrect english **(done)**
- 5: Inactive page: When clicking 'sold' the pop up text needs to say, 'Would you like to mark this item as unsold?' **(done)**
- 6: Add card page: the 'Submit' button is a little bit cut off at the bottom, please make it appear fully or at least allow user to scroll to see full button. **(done)**
- 7: developer name on app to be BINHawk, not Michael Vehtic **(when app will live)**
- 8: Long description to be changed to: **(when app will live) let us know we have to use this long desc or bottom long desc it's written twice**

We connect buyers and sellers, cutting out the middleman and allow you to decide on the payment method for your deal.

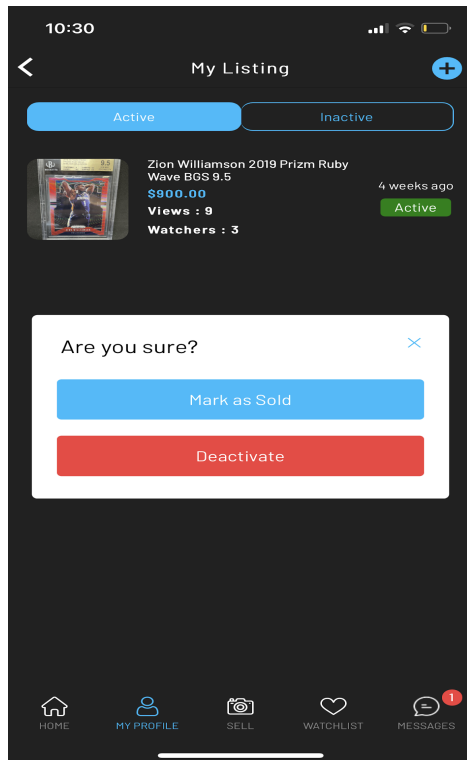

We also have a built in vouching system, check to see who has vouched for the buyer or seller you are dealing with.

-Cheaper buys, better profits

- 9: When messaging users, if you write a long message, the text goes under the arrow and you cant see the word, please stop the text from going under the send arrow.**(done)**

- 10.can we have this box as grey colour and not white. Then have a blue border for the box, similar to the 'Inactive' tab at the top. **(done)**

-Please also remove the text 'are you sure' for the pop up when marking the card as inactive or active. It just needs the two options.

Play store invitation we have set to mizan.webwiders@gmail.com

App name: BinHawk

Descriptions

Short 30 words

BinHawk is your free marketplace for trading cards. A platform allowing sellers to list cards with no fees. This means cheaper cards for buyers and more profits for sellers.

Long

BinHawk is your free marketplace for trading cards. A platform allowing sellers to list cards and connect with buyers with no fees.

This means:

- Sellers can list cards cheaper and retain more profit
- Cheaper buys
- The Hobby wins

BinHawk also has a built-in vouching system, allowing users to check out a buyer or seller's profile and see who has vouched for them.

We connect buyers and sellers, for you to make the transaction in your preferred method.
